

# VT XLRAD-4 PT *camera system* brochure

## VT XLRAD-4 PT high radiation resistant inspection camera

High radiation resistant & watertight tube camera with integrated dimmable lighting, pan and tilt function, with slipping clutch and zoom function

### Applications

- ▶ Nuclear applications - e.g. reactor inspection
- ▶ Decommissioning applications - e.g. pipe and tank inspections, reactor inspecton/hot cells
- ▶ All underwater inspections and monitoring applications in hard to reach areas

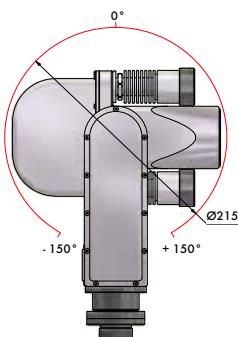

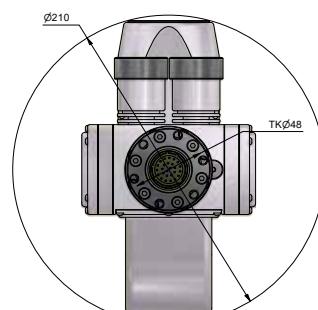

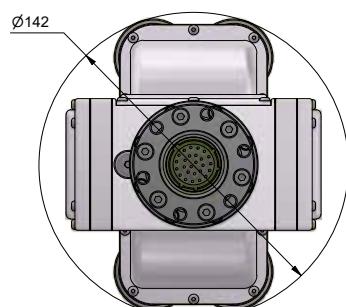

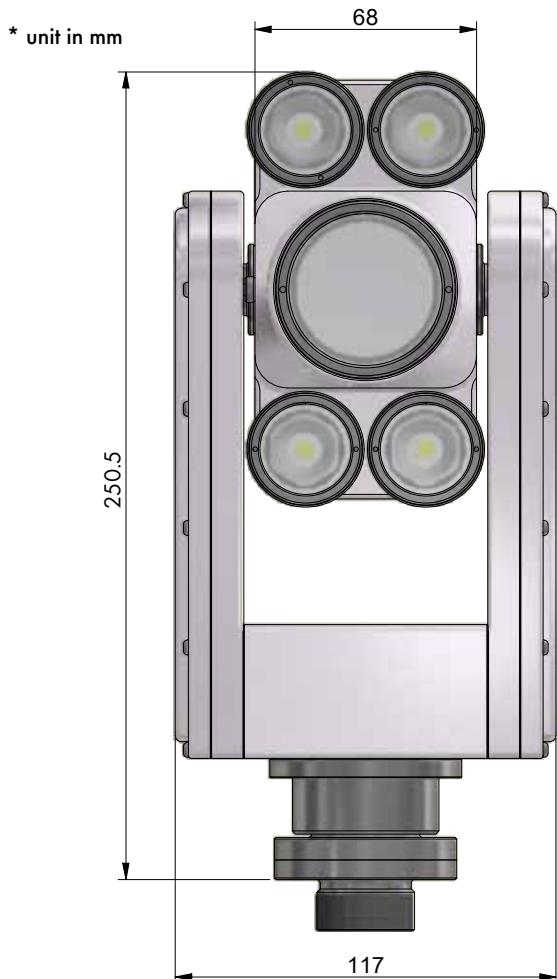

### Features

- ▶ Robust design in anodized aluminum
- ▶ Pan & tilt including slipping clutch
- ▶ High radiation resistant
- ▶ Zoom lens 3x optical
- ▶ Pal signal system
- ▶ Integrated LED lighting
- ▶ Watertight up to 50 m

## Technical specifications - VT XLRAD-4 PT camera system

This document is for general information only, please consult the system manual for detailed specifications

|   |   |
|---|---|
| Housing                                   | anodized aluminum                         |
| Image sensor / number of effective pixels | Vidicon pic-up tube 2/3"                  |
| Horizontal resolution                     | > 460 TV lines                            |
| Signal system                             | PAL (without bust, monochrom)             |
| Light sensitivity                         | 5 Lux                                     |
| Optical zoom                              | 3x  |
| Digital zoom                              | n/a                                       |
| Focus                                     | manual (motorized)                        |
| FOV                                       | ---                                       |
| Minimum object distance                   | 50 mm (depending on system configuration) |
| Video output                              | BAS 1VPP @ 75 Ohm                         |
| Range - PAN                               | infinite                                  |
| Range - TILT                              | 300° ( $\pm 150^\circ$ )                  |
| Lighting                                  | 4x LED spots                              |
| Luminous flux                             | ~ 6,000 lm                                |
| Dimension (LxWxø)                         | 266.5x117x142 mm                          |
| Weight                                    | 3.5 kg                                    |
| Operating temperature                     | ---                                       |
| Water tight / water depth                 | 5 bar / 50 m                              |
| Radiation tolerant                        | 500,000 rad/h (5,000 Gy/h)                |
| Total dose                                | 110 Mrad (1.1 MGy)                        |
| Optionals                                 | ---                                       |
| Features                                  | integrated slipping clutch for pan & tilt |

# Setup

## Possible combinations

Stand-alone system

DIN rail 35 mm compatible and modular control unit

1 Camera

VT XLRAD-4 PT

VT XLRAD-4 PTC

2 Cabling

Cable drum with slip ring  
VT 780 SKT

Cable  
VT 780 K

Cable  
VT 360 PTC HD KCP

3 Control unit

Control unit  
VT 300-3 CU

Control unit  
VT 6360 CU

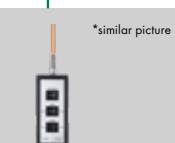

Control unit  
VT CamCtrl

24 V DC

4 Remote control

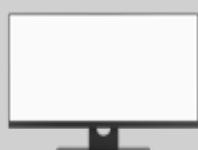

Remote control  
VT XLRAD PT FB

Remote control  
VT XLRAD BFBH

\*similar picture

5 Add-ons

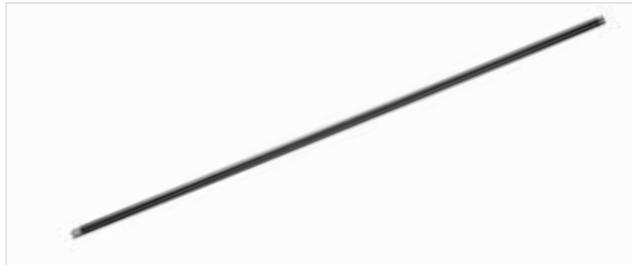

Monitor

Laptop

## Accessories

**VT 29 carbon poles - 29 or 42 mm diameter**

Connectable carbon poles for deployment of cameras and tools - standard lengths are 1 and 2 m

**Manhole holder**

Versatile positioner for 29 or 42 mm carbon poles

**VT 72 holder**

Holder for mounting the camera with VT 29 GR carbon rods

**VT GH Vario tool holder**

Variable railing bracket with stainless steel adapter for connecting the camera to 29 or 42 mm diameter carbon poles

**DEKRA Visatec GmbH**

Gewerbepark 7, 87477 Sulzberg/See
